Abstract :

By jumbling a given Latin word , a Tamil word of similar meaning can be arrived . However it is not a simple anagram as we have use one or more consonants to read Latin words as Tamil words. The significance of the letters - pa- and -sa - has to be understood . Pure Tamil words in Latin language are very few and all most all the Latin words are Tamil suththiram words as we see also in other languages too.

While interpreting the words of different languages i have used the following - **Dravida -Egyptian magical- sacred letters**. They are;

1. ka- vaanam = sky / hot ; vaa- **vaa**nam = sky ; va> Ka ; ka>vaa ; ki - **kayam** - earth; vai - **vaiyakam** - earth; sae/ sa - **Saeyon** = red sun; su/sa - **pa**chha = water ; Ra - **Orai** -an -- sun; pa- **puvi** - earth or ocean or nether world ; an- **andam** = the universe - suffix for men ; akh- **aakku**- to create; am / ma - **om** - the primordial sound- great- big; thee - **thee** = fire/ heat ; da - **idi** - thunder ; the -- thanni- water / cool; **la-** ozhi / oli- nila = light /sound/ moon/ abundnant ; aa- distance; e- near .
